

The San Francisco Tesla Society

October 2010 - Free Lecture Presentation at the
San Francisco Public Library - Richmond Branch
351 9th Avenue @ Clement, San Francisco, California
10th Avenue entrance. Call our Hotline (415) 820-1451 for more information

Sunday, October 10, 2010 1:45 p.m. - 4:00 p.m.

ROB STATES, M.S. P.E. MARY BETH BRANGAN & LAWRENCE BRAGMEN present "***The Dark Side of Smart Meters***". Do you want PG&E to replace your "old fashioned" electricity meter with a new "Smart Meter"?

(HINT: Can you really trust the company that brought us Proposition 16?) PG&E tells us your new smart meter will be "on" 45 seconds a day. In fact, they DON'T KNOW how long it will be on each day, and it may be transmitting dangerous radiation continuously up to 12 hours a day. PG&E tells us it is SAFE. In fact, they have done NO SAFETY TESTING. Their definition of safe is, "We didn't look for safety problems, and therefore it's fine." Sunday's SF Tesla Meeting will present three Smart Meter activists who will give you the inside information that PG&E IS SUPPRESSING.

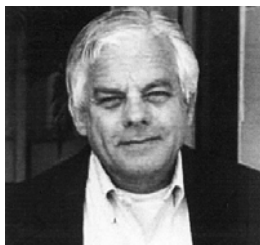

Rob States, M.S., P.E., is a local engineer and returning SF Tesla Society speaker who looked into Smart Meters, and was shocked at what PG&E was not telling us and our city governments. Smart Meters are dangerous, invasive, and legally questionable. Mary Beth Brangan is the Co Director of the Ecological Options Network, and a major activist in Electro-Magnetic Health Protection. Lawrence Bragmen, Attorney at Law, has been a Fairfax City Councilman since 2007. He drafted that city's ordinance prohibiting Smart Meter installations and is a self described "citizen's attorney".

..... IN OTHER NEWS

Sunday, November 14, 2010 2 p.m. at a DIFFERENT LOCATION - NOT A REGULAR MEETING

THE DAKIN FAMILY & FRIENDS present "***A Memorial Tribute to Henry Saltonstall Dakin***". Please join us at

Henry S. Dakin 1936 - 2010

the Golden Gate Club, 135 Fisher Loop in the Presidio of San Francisco as we celebrate the extraordinary life of Henry Dakin. Born in 1936, Henry Dakin was a 4th generation Californian who used his resources & knowledge to empower individuals & businesses ignored by the traditional philanthropic community. He worked tirelessly for peace during the Cold War by fostering lines of communication between citizens of the U.S. & U.S.S.R. After graduating from Harvard, he worked at Lawrence Radiation Laboratory in the 1960's and designed a pocket radiation detector that is still protecting workers today. In the 1970's Henry worked with Anton Wilson, Frijof Capra, Uri Geller and others as a member of the Physics Consciousness Research

Group (purportedly the inspiration for the "Ghostbusters" film). Henry was closely affiliated with the Esalen Institute, the Institute of Noetic Sciences & he authored a landmark book on Kirlian photography. Henry also translated and published smuggled writings of political prisoners in the Soviet Union and was once mentioned in Pravda as "the most dangerous man in America."

During the 1980's Henry and his wife Virgila transformed their 3220 Sacramento Street office building into a hub of citizen diplomacy. For the next two decades, Henry's offices incubated many significant fledgling non profit organizations including: the U.N. Association of SF, the SF Global Trade Council, the International Forum on Globalization, Bioneers, the Institute for Global Communications, the Presidio Alliance, Esalen's Russian-American Exchange Program, Internews, Link TV, the Association of Space Explorers, the Center for Citizens Initiatives, the San Francisco Tesla Society and others. This is all but a small snapshot of the outstanding accomplishments of Henry Dakin. He died peacefully at his home in Ukiah on August 25, 2010 at the age of 73.

For more information about the San Francisco Tesla Society, call (415) 820-1451 or visit us on the Internet at www.sftesla.org where you can email us and see free videos of past presentations.
